## Professional Summary

Experienced and results-driven **Frontend Engineer** with over 8 years of expertise in architecting and developing scalable, cross-platform web applications. Proven success in leading **Frontend/UI teams** and delivering **pixel-perfect, accessible, and high-performance** user interfaces using **React.js** and **Next.js**. Skilled in building **responsive designs**, optimizing performance, and ensuring **WCAG-compliant accessibility** standards.

Adept at collaborating with **product, design, and backend** teams to transform ideas into seamless, user-centric digital experiences. Strong command of **JavaScript, CI/CD pipelines**, and **cloud platforms** such as **Microsoft Azure**. Passionate about **coding best practices, UI/UX consistency**, and **mentoring teams** to achieve technical excellence in **Agile environments**. Proficient in leveraging **Generative AI tools** like **GitHub Copilot** and **Cursor** to enhance productivity and innovation.

## Skills

- Html, CSS, SCSS, BootStrap, Tailwind Css
- React JS, Next JS
- Recoil
- Microsoft Azure (Cloud)
- Cross-browser compatibility
- WebPack, NPM, Babel
- Web Accessibility
- CICD Pipeline Workflow
- GEN AI Tools - Co-pilot, Chat GPT
- Agile, Scrum
- Team Management
- Javascript
- Redux
- MongoDB
- Responsive Design
- Jenkins
- AB Experiments
- Version Control - Git / GitHub Desktop
- JIRA / Bitbucket
- UI Testing - JEST, CYPRESS
- FIGMA & UI/UX
- Screen Readers (NVDA)

## Work History

**Senior Software Engineer**, 10/2022 to Current

**BOLD** – Noida, India

- Developed and maintained **reusable UI components** using **React.js** and **Next.js**, implementing functionality based on **product requirements** provided by Product Managers.
- Integrated **RESTful APIs** to fetch and display dynamic data on the frontend, ensuring seamless user interaction and performance optimization.
- Collaborated with **international Product Managers and cross-functional teams** to understand requirements, provide technical insights, and deliver solutions within sprint timelines.
- Actively participated in **Grooming** and **Sprint Planning meetings** with Product Managers, Engineering Managers, and teammates, contributing valuable suggestions and technical inputs.
- Followed **Agile development methodology**, attending daily **Scrum meetings** to share progress updates, discuss challenges, and assist teammates in resolving technical blockers.
- Proficient in using **version control and project management tools** such as **GitHub Desktop**, **SourceTree**, **Bitbucket**, and **Jira** for efficient code management and collaboration.
- Resolved **SEO, Schema, LCP, FCP**, and other **web performance** issues to enhance user experience and site rankings.
- Experienced in using **web performance analysis and optimization tools** including **Google Search Console (GSC)**, **PageSpeed Insights**, **SimilarWeb**, **HTML Validator**, **AXE DevTools**, and **Lighthouse**.

**Software Engineer**, 10/2020 to 10/2022

**BOLD** – Noida, India

- Worked on multiple **resume-building** and **cover letter generation** portals, focusing on creating user-friendly, scalable, and performance-optimized interfaces.
- Experienced in developing applications using **Web Components** and **Styled Components** for modular and maintainable UI architecture.
- Built **responsive web applications** using **Bootstrap**, **Tailwind CSS**, and **custom CSS**, ensuring consistent performance across devices and screen sizes.
- Designed and implemented **React.js components** from scratch, utilizing **React Router**, **Redux** for state management, and **Context API**, while defining clean and scalable **folder structures**.
- Regularly collaborated with **Product Managers** and **Engineering Managers** to provide **product improvement inputs** and enhance overall user experience.
- Skilled in working with **JSON data** and implementing **Localization** features to adapt portals for multiple languages and regions.
- Experienced in **Agile environments**, contributing to successful delivery across **2- and 3-week sprint cycles**, maintaining focus on quality and timely execution.

**Frontend Developer**, 12/2019 to 10/2020

**Mobikasa Private Limited** – New Delhi , India

- Worked as a **Frontend Developer**, contributing to the **UI and frontend stack** for company portfolio websites, **Shopify-based eCommerce applications**, and **banking applications** using **HTML**, **CSS**, and **jQuery**.
- Successfully delivered projects that met and exceeded **client expectations**, ensuring quality, performance, and timely completion.
- Actively participated in **planning** and **grooming meetings**, collaborating with cross-functional teams to define requirements and implementation strategies.
- Developed and maintained the **Bank of Montreal (Canada)** website frontend, ensuring **web accessibility** compliance and an optimal user experience.
- Contributed to the **company's portfolio website**, built with **WordPress**, focusing on design consistency and responsive layout improvements.
- Worked on the **frontend of Magento-based eCommerce websites**, enhancing UI functionality and improving overall user engagement.

**Frontend Developer**, 04/2019 to 12/2019

**Zmart Tech Partners** – New Delhi, India

- Worked as a **Frontend Developer** at a **Delhi-based travel technology company**, primarily responsible for delivering major **client-side interfaces** and product features.
- Utilized technologies such as **HTML5**, **CSS3**, **JavaScript**, and **Front-end frameworks** to build responsive, high-performing, and visually appealing web interfaces.
- Enhanced **user experience** through the implementation of new features, UI improvements, and performance optimizations.
- Designed and developed **responsive mobile and desktop pages** with minimal use of Bootstrap for lean, efficient layouts.
- Contributed to airline-related projects including **Fly Dubai** and **SpiceJet**, ensuring consistent branding and performance across platforms.
- Improved the **mobile-friendliness** and SEO compliance of landing pages to enhance search visibility and conversion rates.

**Associate Frontend Developer**, 08/2017 to 04/2019

**Hungreeminds Networks Private Limited** – New Delhi, India

- Worked as an **Associate Frontend Developer** at a **Chennai-based event technology startup**, primarily responsible for delivering the **client-side interface** and key product features.
- Utilized **HTML5**, **CSS3**, **W3CSS**, and **JavaScript** to build interactive and responsive user interfaces for web applications.
- Focused on **mobile responsiveness** using **media queries** to ensure seamless performance across devices.

- Implemented **Google Analytics** across all web pages to track performance metrics and user engagement effectively.
- Independently developed the **user interface of an engagement web application** designed for **corporate events** and **employee interactions** through timelines and chat features.
- Improved **SEO** for company blogs, resulting in increased **organic traffic** and enhanced search visibility.

## Education

**Bachelor of Technology:** Electronics and Communication Engineering, 2015  
**APJ Abdul Kalam Technical University** - Noida

**Intermediate:** Physics, Chemistry, Mathematics, 2011  
**Central Board of Secondary Education** - Noida

**High School:** Physics, Chemistry, Mathematics, 2009  
**Central Board of Secondary Education** - Noida

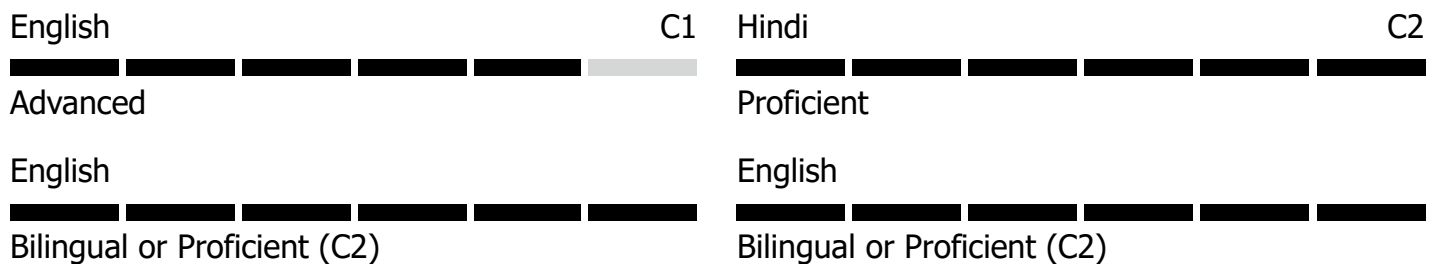

## Affiliations

- Mentored and guided **new joiners** to understand the **work processes, code structure, and project workflows**, ensuring smooth onboarding.
- Actively participated in **Grooming** and **Sprint Planning meetings**, contributing valuable inputs to improve estimation accuracy and implementation efficiency.
- Consistently delivered **bug-free, production-ready code** by following best practices in testing, code review, and QA collaboration.
- Conducted **Knowledge Transfer (KT) sessions** for team members and new joiners when introducing new tools, features, or processes.
- Demonstrated strong understanding of **Web Accessibility (WCAG)** principles, ensuring inclusive design and implementation across web applications.
- Collaborated closely with **designers and backend developers** to align frontend implementations with product vision and technical feasibility.
- Proactively identified and resolved **UI/UX inconsistencies**, improving user satisfaction and maintaining brand standards.
- Participated in **code reviews**, promoting **clean code, performance optimization**, and adherence to **company coding standards**.
- Actively contributed to improving **frontend architecture** and **component reusability**, reducing development time for future features.
- Supported **Agile team ceremonies** including retrospectives, contributing suggestions for workflow optimization and better sprint outcomes.

## Certifications

- The Complete JavaScript Course For Web Development - **Udemy**
- Full Stack web development certification
- Introduction to Web Accessibility WCAG 2.1 - **Udemy**
- Creating Accessible Websites - **Udemy**
- Introduction to WAI-ARIA - **Udemy**
- React - The Complete Guide (incl Hooks, React Router, Redux, Next Js, React Animations) - **Udemy**
- Creative Advanced CSS Animation (100 Projects) - **Udemy**
- The Complete SASS and SCSS Course: From Beginner to Advanced - **Udemy**

## Languages

## Projects

**BOLD.PRO**

- It creates an online website using your resume, Technologies used are React js, Next js, Node Js, Web Accessibility, HTML, SCSS, Animations. Development process used: CICD, and AGILE
- **Project Link:** <https://bold.pro/>

## MyperfectResume (Resume builder)

- It is used for creating an resume, ATS friendly, Technologies used are HTML, SCSS, CSS, React js, Node Js, Web Accessibility, Designing, Animations. Development process used: CICD, and AGILE
- **Project Link:** <https://www.myperfectresume.com/>

## Fortiva

- It's a credit card service provider project, Technologies used are HTML, CSS, CSS Animations, JavaScript, React js, Web Accessibility.
- **Project Link:** <https://www.myfortiva.com/>

## BMO Harris Bank

- It is canada based bank web application, Technologies used are Purely HTML, CSS, WebAccessibility, JavaScript.
- **Project Link:** <https://www.bmo.com/en-ca/main/personal/>

## Flex Jobs

- It a job portal where you can find flexible and work from home jobs, Technologies used are React js, Next js, Node Js, Web Accessibility, HTML, SCSS, Animations.
- **Project Link:** <https://www.flexjobs.com/homevariant/t1>

## Hobbies

Singing, playing musical instruments, practicing astrology, and reading technology and leadership books and articles.
